

# DATA ANALYSY CAPSTONE

Luiz Pereira  
October/24

# OUTLINE

---

- Executive Summary
- Introduction
- Methodology
- Results
  - Visualization – Charts
  - Dashboard
- Discussion
  - Findings & Implications
- Conclusion
- Appendix

# EXECUTIVE SUMMARY

---

- Web development languages are the most popular in use and will remain as such
- AI and Machine learning are driving trends language use
  - Python and SQL are growing in popularity
  - Interpreted languages, easier to learn, are trending up
  - The most popular languages are all focused on manipulating data
- A noticeable shift in databases away from mySQL towards PostgreSQL is developing
- NoSQL databases are trending
- Platform usage is dominated by web centered frameworks

# INTRODUCTION

---

- The most popular languages remain those focused on web development
- A growing trend is a group of languages related to data and machine learning
- Older compiled languages are continued to lose popularity
- Databases show a shift in the most popular open-source database
  - MySQL is dropping in popularity
  - PostgreSQL is replacing MySQL
  - MicrosoftSQL server remains the most used licensed database

# METHODOLOGY

---

- Data was gathered from several websites and portals
  - Job posting content was scraped from and IT job website
  - Content was pulled from Portals
  - APIs were used to collect survey data from a leading IT board
- Once the data was collected, the data sets were explored and reviewed to decide how to proceed with normalization
- The data was cleaned and prepared for analysis
  - Duplicate rows and data sets were removed
  - Missing values were dealt with
  - Some data values were normalized or formatted for better analysis

# RESULTS

---

# PROGRAMMING LANGUAGE TRENDS

## Current Year

## Next Year

# PROGRAMMING LANGUAGE TRENDS - FINDINGS & IMPLICATIONS

---

## Findings

- Javascript and HTML/CSS are the top languages for this year and next
- Python will play a larger role next year
- SQL will remain in the top 5 languages

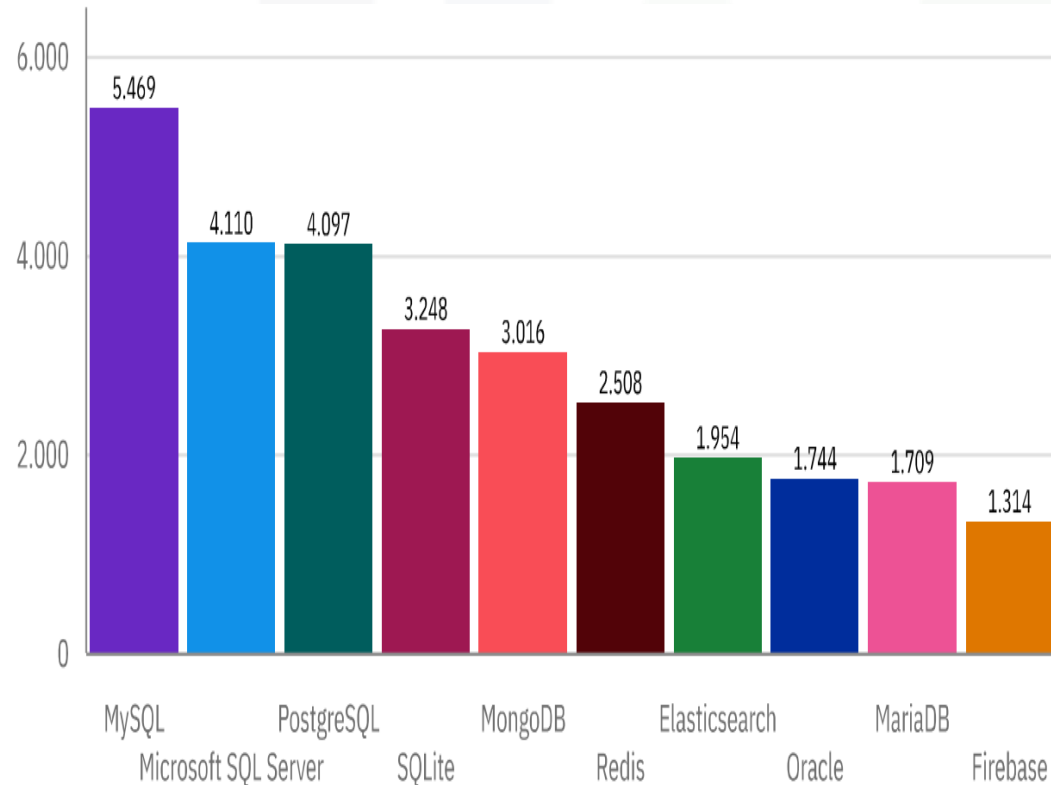

## Implications

- Languages integral to the internet are popular and will remain so
- The highest-ranking languages are interpreted rather than compiled
- The Internet and AI drive the ranking

# DATABASE TRENDS

## Current Year

## Next Year

# DATABASE TRENDS - FINDINGS & IMPLICATIONS

---

## Findings

- Open-sources databases occupy most of the top slots
- MySQL is losing popularity
- MongoDB, a NoSQL database is expected to grow next year

## Implications

- Open-source databases are popular due to features and cost
- Databases from large corporations are dropping in popularity
- NoSQL databases may take a larger role as AI develops

# DASHBOARD

Respondent Count by Age

Respondent por Gender

# DISCUSSION

---

# OVERALL FINDINGS & IMPLICATIONS

---

## Findings

- Languages for internet development the most popular languages
- Interpreted languages focused on AI and data science becoming popular
- Open-source databases are trending

## Implications

- Web development dominates most development
- AI activity is driving future trends in language use
- Large companies are losing ground in their databases usage reach

# CONCLUSION

---

- Point 1
- Point 2
- Point 3
- Point 4

# APPENDIX

## Respondent MainBranch

41 am a developer by profession
